

INDEX TO VOLUME 47

ADLER, J., see HERBERT, D. M.	43
ATHANASIADIS, C. The multi-layered ellipsoid with a soft core in the presence of a low-frequency acoustic wave	441
ATKIN, R. J. and STEWART, I. W. Freedericksz transitions in spherical droplets of smectic <i>C</i> liquid crystals	231
ATKINSON, C., see CRASTER, R. V.	183
BASSOM, A. P., see OTTO, S. R.	323
BASSOM, A. P., see SEDDOUGUI, S. O.	557
BÖVIK, P. On the modelling of thin interface layers in elastic and acoustic scattering problems	17
BURDE, G. I. The construction of special explicit solutions of the boundary-layer equations. Steady flows	247
CAVIGLIA, G. and MORRO, A. Waves at a bonded interface between dissipative solids	305
CHAUDHARY, M. A., see MERKIN, J. H.	405
CHOUDHARI, M., HALL, P. and STREETT, C. On spatial evolution of long-wavelength Görtler vortices governed by a viscous-inviscid interaction. Part 1: The linear case	207
COLLINS, W. D., QUEGAN, S., SMITH, D. and TAYLOR, D. A. W. Using Bernstein polynomials to recover engineering loads from strain gauge data	527
COLTON, D. and KIRSCH, A. Target signatures for imperfectly conducting obstacles at fixed frequency	1
CONSTANDA, C. On non-unique solutions of weakly singular integral equations in plane elasticity	261
CRASTER, R. V. and ATKINSON, C. Mixed boundary-value problems in non-homogeneous elastic materials	183
DANDAPAT, B. S., see RAY, P. C.	297
DAWSON, C. N., see GRUNDY, R. E.	69
DEWYNNE, J. N., HOWELL, P. D. and WILMOTT, P. Slender viscous fibres with inertia and gravity	541
FABRIKANT, V. I. and KARAPETIAN, E. N. Elementary exact method for solving mixed boundary-value problems of potential theory, with application to half-plane contact and crack problems	159
GASKELL, P. H., see MYERS, T. G.	129
GODIN, Y. A. Axisymmetric torsion of an elastic medium containing spherical inclusions	429

GOPINATH, A. Steady streaming due to small-amplitude superposed oscillations of a sphere in a viscous fluid	461
GROVES, M. D. Hamiltonian long-wave theory for water waves in a channel	367
GRUNDY, R. E., VAN DUIN, C. J. and DAWSON, C. N. Asymptotic profiles with finite mass in one-dimensional contaminant transport through porous media: the fast reaction case	69
HALL, P., see CHOUDHARI, M.	207
HANSON, M. T., XU, Y. and KEER, L. M. Stress analysis for a three-dimensional incompressible wedge under body force of surface loading	141
HEMP, J. Error in potential measurements due to non-uniform contact impedance of electrodes	175
HERBERT, D. M., KERR, C. E. and ADLER, J. Diffusion-controlled smouldering combustion with material shrinkage	43
HOHLOV, Y. E., HOWISON, S. D., HUNTINGFORD, C., OCKENDON, J. R. and LACEY, A. A. A model for non-smooth free boundaries in Hele-Shaw flows	107
HOWELL, P. D., see DEWYNNE, J. N.	541
HOWISON, S. D., see HOHLOV, Y. E.	107
HUNTINGFORD, C., see HOHLOV, Y. E.	107
JIANG, Q. and RAJAPAKSE, R. K. N. D. On coupled heat-moisture transfer in deformable porous media	53
JONES, D. S. Physical optics and the surface radiation condition	629
KARAPETIAN, E. N., see FABRIKANT, V. I.	159
KEER, L. M., see HANSON, M. T.	141
KERR, C. E., see HERBERT, D. M.	43
KHAYAT, R. E. Perturbation solution to planar flow of a viscoelastic fluid with two moving free boundaries	341
KIRSCH, A., see COLTON, D.	1
KOUNADIS, A. N. A qualitative analysis for the local and global dynamic buckling and stability of autonomous discrete systems	269
LACEY, A. A., see HOHLOV, Y. E.	107
LESLIE, F. M., see STEWART, I. W.	511
MERKIN, J. H. and CHAUDHARY, M. A. Free convection boundary layers on vertical surfaces driven by an exothermic surface reaction	405
MILOH, T. Pressure forces on deformable bodies in non-uniform inviscid flows	635
MORRO, A., see CAVIGLIA, G.	305
MYERS, T. G., SAVAGE, M. D. and GASKELL, P. H. The indentation of an elastic layer by a sharp punch	129
NAKAGAWA, M., see STEWART, I. W.	511
NORRIS, A. N. and WANG, Z. Bending-wave diffraction from strips and cracks on thin plates	607

OCKENDON, J. R., see HOHLOV, Y. E.	107
OLSSON, S. Transmission and reflection of elastic waves by a spherical obstacle in an infinite circular cylindrical rod	583
OTTO, S. R. and BASSOM, A. P. The effect of crossflow on Taylor vortices	323
QUEGAN, S., see COLLINS, W. D.	527
RAJAPAKSE, R. K. N. D., see JIANG, Q.	53
RAY, P. C. and DANDAPAT, B. S. Flow of thin liquid film on a rotating disk in the presence of a transverse magnetic field	297
ROMEO, M. Inhomogeneous waves in anisotropic dissipative solids	481
RYZHAK, E. I. On stability of homogeneous elastic bodies under boundary conditions weaker than displacement conditions	663
SAVAGE, M. D., see MYERS, T. G.	129
SEDDOUGUI, S. O. and BASSOM, A. P. Nonlinear instability of viscous modes in hypersonic flow past a wedge	557
SELVADURAI, A. P. S. A unilateral contact problem for a rigid disc inclusion embedded between two dissimilar elastic half-spaces	493
SMITH, D., see COLLINS, W. D.	527
STEWART, I. W., see ATKIN, R. J.	231
STEWART, I. W., LESLIE, F. M. and NAKAGAWA, M. Smectic liquid crystals and the parabolic cyclides	511
STREET, C., see CHOUDHARI, M.	207
TAYLOR, D. A. W., see COLLINS, W. D.	527
VAN DUIN, C. J., see GRUNDY, R. E.	69
WANG, Z., see NORRIS, A. N.	607
WILMOTT, P., see DEWYNNE, J. N.	541
XU, Y., see HANSON, M. T.	141
